

How Qwen Cloud connects reality to a governed decision

The browser never calls Qwen directly. The backend receives verified evidence, compiles memory, stores lineage, and returns one auditable DecisionBrief.

02 | COMPANY BRAIN BACKEND

03 | PEOPLE AND CLIENTS

THE IMPORTANT CONNECTIONS

Qwen Cloud is backend-only
No browser credentials or direct model calls.

Qwen output is persisted
Claims retain source IDs, rationale, and freshness.

Frontend receives a governed brief
SAG decides deterministically; a human confirms.
